

Scott learned to  
count objects  
and add  
simple sums from  
NumberMaze.  
He learned  
to spit from  
his brother.

Learning can be fun! **NumberMaze**® is software created by educators to teach children basic math skills. It combines the fun of solving mazes with the challenge of solving math problems, for ages 5–12. And, Scott says it is more fun than video games or spitting! Take it from an expert. **NumberMaze**, elementary math made fun.

Call us for information about our other award winning reading, math, geography, or early learning software for PC or MAC.
